

Dear Friend of the Ener-Chi Wellness Center,

I am happy to tell you about a new venture called Just About Perfect that a respected friend and colleague of mine recently shared with me. The more I learned about it, the more I liked it, and am now enthusiastic, although that is an understatement.

It's a 'Pay It Forward' concept that allows you to get high caliber 'laser' coaching for next to nothing, or nothing. You can receive unlimited coaching sessions per month for the total amount of USD \$25, or at no cost if you inspire two other people to also receive coaching sessions. Basically, this brilliant 'Pay It Forward' system allows every person to take advantage of some of the most talented coaches in nearly every area of life, including health, business, financial, lifestyle and spiritual, and without cost. Additionally, it can also provide a passive income stream - something that many people would welcome these days. Needless to say, all of this got my attention.

As I understand it, Just About Perfect is not network marketing or multi-level marketing, although it resembles some aspects of it in that it offers a similar benefit: you receive a valuable service for a nominal fee - one that may easily be offset - and also have the opportunity to work a very small amount of time and reap a nice, if not big return on your time investment. It's possible to earn a 6-figure income, or up to a maximum of about USD \$13,000 per month in two hours a week, and this could nearly double in magnitude if you're qualified and accepted as a coach in this program.

What I love about this Pay Forward program is that it awards helping others. This makes it a joy to pass it on to others. The concept behind it, which took its founder, Peter Ayers, 15 years to develop, cannot be manipulated or abused for selfish gains. It serves everyone involved.

Just About Perfect is about one month new and is just getting its website fully together now - and a good amount of information is already loaded in. Apparently, this venture is moving faster than the founder expected. Little wonder. It's a valuable service that many people want and need these days, and at a price point that's just about unbeatable and recession-proof. In essence, it comes across as a win-win.
